## SKILLS

**LANGUAGES:** Java, Python, HTML & CSS, JSON, Swift, SQL, XML, Git  
**PLATFORMS:** Windows, Mac OS, Linux  
**SOFTWARE:** Android Studio, Xcode, Adobe Premiere

## PROJECTS

<b>Devsfolio, Open Source</b> Worked in a team to create a social network for developers to share their portfolios. Using Android Studio as the main IDE, we used Java and XML for the design of the app and used Firebase to store data from the users. Had to review code before it was merged into the master branch on Github.	Current
<b>Promptr, Personal</b> Used Java and XML to create a mobile application that allows users to practice their speeches like they are on stage with the options of recording it. Used Firebase UI as the login logic and Firebase Database to store user's information	Current

## AWARDS

<b>National Congressional App Challenge, United States Congress</b> Won an app challenge in the New Jersey district.	Oct. 2016
---	-----------

ACTIVITIES

---

<b>RITSEC</b>	Aug. 2018 - Current
<b>National Society of Black Engineers</b>	Aug. 2018 - Current
